#### 1.2 Significant transactions and events affecting the Company's financial position and performance

The Company had closed its operation since June 16, 2016 and reported accumulated losses of Rupees 470.34 million (June 30, 2021: Rupees 449.61 million). The current liabilities exceeded its current assets by Rupees 779.95 million (June 30, 2021: Rupees 776.90 million) as of balance sheet date. These conditions along with adverse key financial ratios and company's court cases with the banking companies on its inability to comply with covenants of loan agreements and to pay long term financing liabilities against assets subject to finance lease, short term borrowings and related finance costs on due dates indicate the existence of a material uncertainty which may cast significant doubt about the company's ability to continue as a going concern and therefore, that it may be unable to realize its assets and discharge its liabilities in the normal course of business.

These financial statements, however, have been prepared under the going concern assumptions as the management after settling trade creditors is seeking amicable settlement of cases with the banking companies and at the same time in search of local or international investors to enter into joint venture arrangement to invest in the plant and machinery in order to compete with the international market players. Moreover, In order to meet the day to day expenses, the company has leased out the factory premises.
